

Dhruv Tejani

Software Developer | Python, Java & MERN Stack Specialist

✉ dhruvtejani30@gmail.com ☎ 8320496146 📄 github.com 👤 linkedin.com/in/dhruv-tejani-379653378

PROFESSIONAL SUMMARY

Detail-oriented Software Developer specializing in Python, Java, MERN Stack, Full-Stack Web Development, and Machine Learning applications. Experienced in designing, developing, and deploying complete web platforms, relational/NoSQL database-driven solutions, secure REST APIs, and data science diagnostic workflows. Focuses on building scalable and performance-optimized products that solve real-world problems.

TECHNICAL SKILLS

Languages & Databases

Python, Java, JavaScript, HTML5, CSS3, SQL, C, MongoDB, PostgreSQL, MySQL, SQLite

Frameworks & Tools

React.js, Django, Node.js, Express.js, Bootstrap, Tailwind CSS, Git, GitHub, VS Code, Postman, Linux

Machine Learning & Analytics

Exploratory Data Analysis (EDA), Scikit-Learn, Pandas, NumPy, Data Visualization (Matplotlib, Seaborn)

WORK EXPERIENCE

Software Developer

Active Practice

Full-Stack Development & Platform Architectures

- Developed full-stack web applications and built backend REST APIs using Python, Java, Node.js, and Django.
- Designed responsive, browser-compatible user interfaces with modern frontend technologies and CSS grids/flexbox layouts.
- Engineered SQL and NoSQL database structures, executing optimized queries across PostgreSQL, MySQL, and MongoDB.
- Deployed live production platforms, configuring domain associations, security protocols, and web server hostings.
- Collaborated on architectural design, wireframing, and custom solutions targeting client business goals.

KEY PROJECTS

Varunaat (varunaat.in)

Live Platform

Designed, developed, and deployed the complete web application for Varuna Aerotech, a DGCA-certified drone inspection and aerial data intelligence platform. Features 48-hour report turnaround pipelines, IEC 62446-3:2022 compliant solar thermal/EL analytics, and turbine erosion diagnostic widgets.

React.js, Node.js, Express.js, PostgreSQL, GIS Mapping, REST APIs

Job Portal Web Application

Independent

Built a full-stack job matching platform connecting recruiters with candidates. Created dashboards, candidate profiles, application tracking pipelines, and job filter functions.

React.js, Django, PostgreSQL, REST APIs

Investment and Transaction Management System

Academic

Created a desktop-based financial system managing client portfolios, cash logs, yield summaries, and interest calculations backed by a relational database schema.

Java, JDBC, MySQL, OOP principles

CERTIFICATIONS

Exploratory Data Analysis for Machine Learning

IBM

HTML, CSS, and JavaScript for Web Developers

JOHNS HOPKINS UNIVERSITY

Inheritance and Data Structures in Java

UNIVERSITY OF PENNSYLVANIA

EDUCATION

Bachelor of Engineering

Graduated

LJ University • SPI: 8.5 / 10
